4. How to Run in 2 Minutes

1. Get free key: http://aistudio.google.com/app/apikey
2. Install: `pip install -r requirements.txt`
3. Run: `streamlit run app.py`

5.http://README.md for Submission

> *ComicCraft* is an AI-powered app that converts a

simple idea into a full comic story with panel-wise dialogues, captions, and ready-to-use image generation prompts. Built using *Google Gemini 1.5 Flash*, Streamlit UI, and structured JSON output. Features: Genre selection, art style control, 3-8 panels, downloadable story.

Structure

1. Title - Team Names: Bhavani.s Pavithra.E R

Elakiya.s s Vinitha A Raji.M

2. Problem - Creating comics is hard, needs drawing skill

3. Solution - ComicCraft using Gemini

4. Architecture Diagram - User -> Streamlit -> Gemini API -> JSON -> Comic Panels

5. Features Demo - Screenshot

6. Tech Stack - Python, Gemini 1.5 Flash, Streamlit

7. Future Scope - Add actual image gen with Imagen, voice-over, PDF export

8. Thank You
